# ECO PLANET RECOVERY LTD

# INTRODUCTION

Welcome to Eco Planet Recovery Ltd, a pioneering recycling company dedicated to transforming waste into valuable resources and contributing to a sustainable future for Nigeria. Registered with the Corporate Affairs Commission (RC: 7201607), Eco Planet Recovery Ltd is a forward-thinking organization that leverages innovative technologies and best practices to minimize environmental footprint and maximize social impact. With a passion for environmental stewardship and a commitment to excellence, our team works tirelessly to provide efficient, effective, and sustainable recycling solutions that benefit our communities, customers, and the planet. In this company profile, we invite you to explore our journey, our values, and our vision for a greener, healthier Nigeria. Learn about our services, our achievements, and our dedication to creating a better future for all.

**BASHIR DALHATU RIBADU**

CHIEF EXECUTIVE OFFICER  
ECO PLANET RECOVERY Ltd.

# MESSAGE FROM THE CHIEF EXECUTIVE OFFICER

With a very strong background in business and trading, when I came back to Nigeria after university, I was looking for a sector to venture into, then I saw heaps of waste especially plastic wastes been mismanaged and littered all around the environment, I saw an opportunity right there because I know the value of these wastes and how big the market for it is, so I know a lot had to be done, I took this challenge upon myself to provide solutions and capitalize on it and also provide several job opportunities for people. I went ahead and did my feasibility study and market research and I found out that Nigeria generates an average of 2.5 million metric tones at plastic waste and ranks 9th in the world with the most plastic waste, and with a population of over 200 million people, this figures are going to keep growing, and it is also a multi billion dollar industry, out of these plastic waste generation Nigeria recycles around 100,000 metric tones per annum, of these which is around 6% of what we generate new, this was a big opportunity and the beauty of it is that the problem faced in Nigeria is the same in other African countries.

So, I decided to start in bits. We started with the collection of the PET bottles which has two values, the PET bottle and the PP bottle caps, then we began sorting as well and selling. Shortly after I decided to purchase some machineries and equipments mostly bailing machines, then we began bailing the plastics and crushing the PP caps and selling it to the end users of the products mostly industries in Lagos. We were doing this for a while, which created a lot of direct and indirect job opportunities from, they pickers, collectors, drivers, sorters, staffs, loaders etc. At this point we were creating around 50-70 direct to indirect jobs. After a while I knew more needed to be done, I purchased more equipments and machines and also opened up more collection centers and gave some bailing machines to them. After some time doing this I began the construction of a new plant which I just completed with a capacity to produce around 600 metric tones of PET cold wasted flakes and 100 metric tones of PP pellets per month with plans for expansion when operation begin. This would create hundreds of direct and indirect job and, along a lot of environmental, social and economical values and also promote circular economy. This is our growth journey so far playing in every stage of the chain and with the vision of growing to be the No. 1 in the recycling industry in Nigeria and Africa and to be a major player in the global industry.

# OUR PURPOSE

At Eco Planet Recovery Ltd, our purpose is to empower a sustainable future for Nigeria by revolutionizing waste management and recycling. We strive to create a cleaner, healthier environment where generations can thrive.

# OUR MISSION

Our mission is to provide innovative, efficient, and sustainable recycling solutions that:

- Minimize waste and maximize resource recovery
- Foster partnerships and education for a circular economy
- Support the well-being of our communities and the environment
- Drive continuous improvement and excellence in all we do

By living our mission, we aim to make a positive impact on the environment, society, and the economy, creating a better future for all.

# PROJECTIONS

Our projection is that by 2nd/3rd quarter of 2025 we will expand our plant by creating a second line with more capacity, which we would also have to open up more collection centers across the region to feed the plant, and also to expand our fleet of collection trucks so as to have adequate supply of plastics waste. We also project that in the next 3 years we would reduce and recycle more plastics waste by at least 1.2 - 1.5% from the current figure which is around 6% to 7.2 - 7.5%. We project to recover between 30,000 - 35,000 metric tones of plastic waste within the next 3-5 years.

# OUR SERVICES

- Waste collection and management
- Recycling and processing services
- Environmental consulting and auditing
- Sustainability training and education
- Waste reduction and minimization strategies
- Recycling facility management and operations
- Environmental impact assessments and reporting
- Sustainable supply chain management
- Research and development of new recycling technologies

# TESTIMONIES

---

## BASIRU AUWALU

Eco Planet Recovery has provided me with a baler which has given me a big opportunity, which today I collect and bale an average of 100 metric tones of plastics per month. This creates a big income for me and my employees.

## MUBARAK KUCHIKAU

Eco Planet Recovery provided me with a seed capital to open up a collection center, which today an average we collect 20 metric tones of plastic waste per month.

## SHEHU KUJE

I am a farmer by profession, due to the insecurity situation in my state, I had to leave with my family to Abuja to begin a new life, I sent my children hawking one day and when they came back they told me someone told them to invite me (their father) the next day, I went and to my surprise the CEO of Eco Recovery Ltd advised me to give them opportunity to go to school instead of hawking and that he would be paying their fees, which he bought the admission forms and enrolled them. May God bless them!

# STAFF STRENGTH

Eco Planet recovery works with staffs that have several years of experience in the sector and also across other sectors to help run the day to day activities of the business.

# SAMPLES

# CALL TO ACTION

## Here are some calls to action on waste recycling:

- **Reduce:** Limit your use of single-use plastics like bags, straws, and water bottles.
- **Reuse:** Use reusable bags, containers, and water bottles instead.
- **Recycle:** Make sure to recycle as much plastic as possible, including bottles, cans, and paper.
- **Upcycle:** Get creative and find new uses for plastic items you might otherwise throw away.
- **Participate:** Join local clean-ups and advocate for plastic waste reduction in your community.
- **Educate:** Share what you learn about plastic waste with others and encourage friends and family to take action.
- **Support:** Back organizations working to reduce plastic waste and promote sustainable practices.
- **Demand change:** Push companies and governments to adopt sustainable packaging and waste management practices.

**Remember, every small action counts,  
and collective efforts can lead to significant  
positive change!**
